

## Background

SUCELLOG aims to promote and boost the participation of the agrarian sector in the sustainable supply of solid biomass in Europe.

SUCELLOG focuses on an almost unexploited logistic concept: the implementation of biomass logistic centres into agro-industries as complement to their usual activity. Agro-industry facilities can be utilised in idle periods to handle and pre-treat biomass feedstock (mainly from agricultural residues) to produce high quality solid biomass to be introduced into the market.

## SUCELLOG goals

- Provide technical and decision-making support to agro-industries willing to start operating as solid biomass logistic centres.
- Create capacities in regional and national agrarian associations to provide support service to their associates, thus ensuring permanent skills in Europe.

## SUCELLOG for agro-industries

**Are you an agro-industry interested in becoming a logistic centre?**

SUCELLOG can provide you free support to:

- Evaluate which and how much raw material is available.
- Determine raw material pre-treatment options to reach high quality solid biomass.
- Assess the best consumers of your product.
- Estimate the needs for investment and contact potential equipment suppliers.
- Evaluate the feasibility of your project.
- Obtain guidance for sustainability compliance, quality labelling and assurance.

## SUCELLOG for agrarian associations

**Are you interested in building-up skills in the field of logistic centres for agro-industries?**

- National and regional agrarian associations of EU28 have the opportunity to receive free training and support to become an expert on this topic and offer new consultancy services to their associates.

**To receive free support from the project, contact:**

## SUCELLOG concept

## Target countries & regions

SUCELLOG targets all EU regions. However, main activities are developed at national and regional scale in the territories shown in the map.

**Any agro-industry or agrarian association in EU28 countries can receive free support from the project.**
